SUMMARY

B.Tech CS student at AKTU with expertise in full-stack development, blockchain, and problem-solving. Proficient in Python, C++, JavaScript, React, Node.js. Built 5+ scalable applications including CV systems and secure platforms.

EXPERIENCE

Freelance Developer

Freelancer.com

- Built 5+ full-stack applications including e-commerce platforms, health record systems, and computer vision tools using React, Node.js, and Python, deployed on GitHub with comprehensive documentation.
- Architected scalable database solutions with MySQL and MongoDB, implementing secure authentication and RESTful APIs for seamless data management across multiple projects.
- Maintained version control across 10+ repositories using Git/GitHub with 200+ commits, ensuring code quality and project organization.
- Solved 35+ algorithm problems on LeetCode focusing on data structures, dynamic programming, and optimization techniques to strengthen technical problem-solving capabilities.

PROJECT

Visual Search - SearchLens

Personal Project • github.com/garv2214/VISUALSEARCH

- Developed AI-powered visual search engine using Python, TensorFlow, and ResNet-50 CNN architecture for image-based product discovery, processing 1,000+ images with feature extraction and similarity matching.
- Implemented FAISS indexing algorithm for efficient nearest-neighbor search, achieving sub-200ms query response times and 92% accuracy in visual similarity detection across product catalogs.
- Built React frontend with drag-and-drop image upload, RESTful API integration using Axios, and real-time search results display, enabling seamless user experience for visual product discovery.

Core Weave - Full-Stack E-Commerce Platform

github.com/garv2214/Core-Weave

- Engineered full-stack e-commerce platform using React, Node.js, and Express.js with product catalog, shopping cart, and secure checkout functionality.
- Designed MySQL database schema with normalized tables for products, orders, users, and inventory management, implementing JWT-based authentication and authorization.
- Integrated Stripe payment gateway API and built admin dashboard for inventory tracking, order management, and sales analytics with real-time updates.

Hand Gesture Recognition System

Personal Project • github.com/garv2214/Hand-Gesture

CareVault - Digital Health Record Management System

Personal Project • github.com/garv2214/CareVault

- Built blockchain-based patient-centric health record system using Ethereum, Solidity, IPFS, and Hardhat with AES-256 encryption, enabling tamper-proof medical data ownership and role-based access control for 3+ user types.
- Developed custom smart contract for immutable metadata storage, emergency access system with on-chain audit logging, and decentralized storage via IPFS with end-to-end encrypted upload flow supporting 100+ records.
- Engineered Node.js REST API with Ethers.js for blockchain interaction, real-time event monitoring, and secure data retrieval, eliminating centralized breaches while ensuring HIPAA-compliant privacy and transparency.

Personal Finance Management Application

github.com/garv2214/Personal-Finance-Application

- Developed full-stack personal finance tracking application using React, Express.js, and MySQL for expense tracking, budget management, and financial analytics.
 - Designed relational database schema for transactions, categories, budgets, and recurring expenses with data visualization using Chart.js for spending insights.
 - Implemented user authentication, automated budget alerts, and monthly financial reports with export functionality, enabling users to track and optimize spending habits.
-

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow • Lucknow • 2023-2027

SKILLS

Python, C++, C#, JavaScript, SQL

React, Node.js, Express.js, HTML, CSS

MySQL, MongoDB

Blockchain Development, Decentralized Applications, Smart Contract Concepts

OpenCV, MediaPipe

Data Structures & Algorithms, Problem Solving

Git, GitHub
